About Us

QUBIST empowers government agencies with innovative IT modernization and seamless cloud transitions. Leveraging expertise in cybersecurity, Agile methodologies, cloud engineering, AI/ML, and software development, we deliver secure, efficient, and tailored solutions. Our strategic insights from advanced data science and robust system architecture, combined with agile project management, ensure excellence and compliance. Committed to strong partnerships and exceptional service, QUBIST enables agencies to achieve their missions and surpass their goals with the highest quality standards.

Differentiators

QUBIST is driven by a team with extensive experience leading successful government IT projects at leading firms. This deep industry expertise enables us to offer government agencies a unique blend of cybersecurity, Agile methodologies, cloud solutions, data science, AI/ML, and comprehensive IT services. We deliver customized, holistic solutions tailored to each agency's specific needs, consistently completing projects on time and within budget. Leveraging cutting-edge technologies, we drive innovation and efficiency while ensuring full compliance with all regulatory standards. Our commitment to exceptional customer service and dedicated support fosters strong, long-term partnerships, ensuring sustained success for our clients.

Certifications

Our Partners

Core Competencies

Cybersecurity

Offering robust cybersecurity measures that protect government systems with advanced threat detection and comprehensive compliance frameworks.

Cloud / System Engineering

Delivering secure and scalable cloud solutions that enhance efficiency and optimize data accessibility for government agencies.

Software Development

Providing innovative software solutions that support government operations through advanced technologies and seamless infrastructure integration.

Data Science / Artificial Intelligence

Leveraging data science and AI/ML to empower government agencies with predictive analytics and data-driven decision-making capabilities.
